4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations and provide a list of newly served community anchor institutions.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission's public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas.

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year. Name of Attached Document Listing Required Information

Line 610 - Emergency Operations Functionality & Capability

The Company prides itself on updating and maintaining all of its plant and equipment to prevent outages before they happen. If outages do occur, the Company has a 24-hour/7 days-a-week on call staff and alarm reporting systems in place that send the necessary notifications to the 24-hour/7 days-a-week personnel monitoring these systems. The Company certifies that it follows best practices that are designed to allow them to remain functional in an emergency situation through the use of back-up power to ensure functionality.

Absent catastrophic failure of the network or elements of it, the Company has the capability to engage in some re-routing of traffic based on what facilities are damaged. While the Company has engineered its network based on accepted industry engineering practices, changing call routing may, to some extent, permit the Company to manage traffic patterns throughout its network during emergency situations.

The Company performs exercises to test disaster preparedness on each site's back-up power systems and they are tested weekly. Major transport facilities are also tested periodically to ensure failover reliability.

The company provides the following information regarding its central office back-up battery and generator capability during electricity failures within its operating areas. The company has deployed battery back-up power in its central office that will produce an estimated twenty(20) hours of back-up power for the Company's central office. The initiation of the Company's battery back-up capability is triggered instantaneously of the network identifying the existence of a loss of power.

The Company also has a back-up gas generator that is available at its central office should it be necessary. The generator would provide an additional 100 hours of back-up power capability based on fuel capacity. Assuming the availability of fuel at the locations, the generator would provide sufficient power to operate even longer absent some unforeseen breakdown of it. Based on current contingency preparation plans, the Company estimates that the necessary generator-provided back-up power capability can be deployed and functioning within a minute of the identification of its need, well within the time frame of the estimated battery power back-up capability possessed by the Company. In addition, the Company has two portable generators that can be moved to the necessary site(s) to recharge batteries at the site(s). The following is a listing of remotes with the appropriate back-up battery and/or generator capability:

Remote Name	Battery Run Time Estimated	Generator	Generator Run Time Estimated

Lifeline Certification, Verification, and Confirmation for Determining Initial and Continuing Eligibility of
Consumers for USF Supported Lifeline Services

General Assertion/Certification:

The Company has policies and procedures in place to ensure that its Lifeline subscribers are eligible to receive Lifeline services. The Company has instituted certification and verification procedures in accordance with Section 54.416 of the rules of the Federal Communications Commission (the "FCC"). Specifically, the Company refers to any and all consumers who request USF supported services from Hardy Telecommunications to the West Virginia Department of Health and Human Resources for proper confirmation and documentation of eligibility. Hardy Telecommunications proceeds with instituting such services after the proper documentation of eligibility from the DHHR is received from the consumer.

In addition, as required by Section 54.410 of the FCC's rules, the Company obtains a valid certification form for each subscriber for whom the Company will be seeking Lifeline reimbursement. A copy of the Company's "Annual Lifeline Certification and Verification" form has been attached to the Company's submission in response to the May 1, 2012 "Commission Order" in the above referenced proceeding.

Based on the foregoing, my knowledge, information and belief, I hereby certify that the Company has policies and procedures in place to ensure that its Lifeline subscribers are eligible to receive Lifeline services, that the Company is in compliance with all federal Lifeline certification procedures, and that the Company has obtained a valid certification form for each subscriber for whom the carrier seeks Lifeline reimbursement.

Re: Certification of Public Interest Obligation

Dear Ms. Dortch:

In compliance with the filing requirements associated with, and attached to Form 481, we wish to advise the Commission that Hardy Telecommunications, Inc. provides High Speed Internet service to its customers and

- Has taken reasonable steps to provide upon reasonable request broadband service at actual speeds of 10 Mbps downstream / 1 Mbps upstream;
- Provides latency suitable for real-time applications including VoIP and usage capacity which is reasonably comparable to those in urban areas and;
- That reasonable requests for service are met within a reasonable timeframe.

If there are questions, I may be contacted at 304-897-9911.

Sincerely,

D. Scott Sherman
